35V

CLASSIC ELECTRIC VEHICLE

VATIO 35V

VATIO's first limited edition Classic Electric Vehicle offering is the VATIO 35V. Based on a fastidiously hand-crafted & bolt-accurate replica Bugatti 35B, the VATIO 35V sports a ground-up custom electric powertrain design that modernizes the iconic pre-war racing car legend. The VATIO 35V is an impeccably balanced marriage of form & function that boldly celebrates the past and embraces the future. Carefully designed by former Tesla and SpaceX engineers, the 35V celebrates Ettore Bugatti's technical innovation and design philosophy by pairing his groundbreaking mechanical design with the incredible performance and maintenance-free reliability of the cutting edge in electrical vehicle technology.
